Professional Summary

Computer Science and Engineering (Data Science) graduate with expertise in Python, Java, SQL, Machine Learning, and Data Analytics. Experienced in developing AI-driven applications, predictive models, and full-stack web solutions using ReactJS and Node.js. Passionate about building scalable software solutions and solving real-world problems through technology.

Technical Skills

Programming Languages: Python, Java, C

Web Technologies: HTML, CSS, JavaScript, Node.js

Databases: MySQL, MongoDB

Data & Machine Learning: Pandas, NumPy, Scikit-learn, TensorFlow, CNN, Deep Learning, EDA, Feature Engineering, Predictive Modeling

Visualization: Power BI, Tableau, Microsoft Excel

Tools: Git, GitHub, Google Colab, VS Code, Streamlit, n8n, Figma, Vercel

Internship Experience

Take It Smart (OPC) Pvt Ltd.

Feb 2026 – May 2026

Data Science Intern

- Developed TensorFlow-based deep learning models for mask detection and rice image classification using CNN architectures.
- Performed data preprocessing, image augmentation, model evaluation, and exploratory data analysis for computer vision tasks.
- Built Streamlit applications for real-time predictions and visualization and automated workflows using n8n.

Projects

ML-Based Career Assessment System | Python, Scikit-learn, SQL, Power BI

Nov 2025

- Developed an AI-driven adaptive assessment system using supervised learning and feature engineering techniques.
- Improved model performance through hyperparameter tuning and evaluation metrics and visualized insights using Power BI dashboards.

Customer Churn Prediction App | Python, Scikit-learn, Streamlit, Pandas

- Developed a machine learning application to predict customer churn using Logistic Regression and Random Forest algorithms.
- Performed data preprocessing, exploratory data analysis, and feature engineering to improve model performance.
- Built an interactive Streamlit interface that enables users to enter customer details and obtain real-time churn predictions.

Mask Detection | Python, TensorFlow, CNN

- Developed a Convolutional Neural Network (CNN) model using TensorFlow to classify images as "Mask" and "No Mask".
- Performed image preprocessing, data augmentation, model training, and evaluation to improve classification performance.
- Implemented a prediction pipeline in Python for testing images and analyzing model predictions.

Education

Vivekananda College of Engineering and Technology

2022 – 2026

Bachelor of Engineering - CSE (Data Science)

CGPA: 8.8

Dr. A.V. Baliga College of Arts and Science

2022

Senior Secondary - PCMC

86.13%

Nirmala Convent High School

2020

Secondary Education

85.44%

Certifications

- **NPTEL – Cloud Computing:** Studied cloud architecture, virtualization, and service models.
- **Microsoft Certified – Power BI:** Expertise in dashboard creation, data modeling, and DAX fundamentals.
